SAMUEL MOLLA

SOFTWARE DEVELOPER | FULL-STACK WEB & CROSS-PLATFORM APPLICATIONS

Surrey, BC | (778) 793-2809 | sambenmayu@gmail.com

samuelmolla.dev | github.com/Mayufisha

PROFILE

Computer Systems Technology diploma graduate building full-stack web and cross-platform applications. Hands-on experience with React, TypeScript, Node.js, C#/.NET MAUI, relational databases, authentication, automated testing, and deployment. Seeking a junior software developer opportunity to build useful, reliable products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Python, Java, SQL, HTML, CSS
Web & apps: React, React Native, Node.js, Express, ASP.NET Core, .NET MAUI, XAML, Tailwind CSS, Electron
Data & tools: PostgreSQL, SQLite, MongoDB, Supabase, Git/GitHub, GitHub Actions, Docker, Netlify, AWS fundamentals

SELECTED SOFTWARE PROJECTS

ShiftTopo - Workforce Coordination Prototype | React, TypeScript, Node.js, SQLite, Electron

- Built web and Windows desktop prototypes for manufacturing shift assignments, machine qualifications, work-order queues, break relief, absences, and handovers.
- Implemented role-based workspace permissions, conflict detection, and session handling. Published a separate fictional demo at demo.shifttopo.com.

Money Manager with SplitFare | C#, .NET MAUI, SQLite, Supabase

- Developed Android and Windows finance workflows for expenses, budgets, goals, statement imports, and shared bills with SplitFare.
- Added share validation, atomic local data updates, and cloud backup configuration with row-level access policies. Passed 63 automated tests and released a signed Android bundle to Google Play internal testing.

CareHub - Web & Mobile Care Platform | React, React Native, ASP.NET Core, PostgreSQL

- Built care-facility workflows for residents, medications, staff, medication administration records, inventory, and handoffs across web and mobile interfaces.

SkillSwap 2.0 & Job Application Tracker | React, Node.js, Express, MongoDB

- Developed responsive applications for peer learning and job application tracking, with reusable UI components, authentication, REST APIs, and database-backed workflows.
- Deployed web applications and investigated integration, API, connectivity, and deployment issues using Git-based development workflows.

WORK EXPERIENCE

Machine Operator | Columbia Plastics Ltd., Surrey, BC | May 2026 - Present

- Inspect products, measure output, identify defects, and follow production quality and safety requirements. Use IQMS for inventory records and report production issues.

EDUCATION & CERTIFICATIONS

Computer Systems Technology Diploma | Vancouver Community College | 2024 - 2026
Computer Science Studies | Unity University, Addis Ababa | 2022 - 2023

Meta Front-End Developer, Coursera (2024) | Cisco Networking Essentials (2025)
Cisco IT Essentials (2024) | Languages: English, Amharic
